# Pre-Apprenticeship in Career Education (PACE)

A Rutgers Youth Success Program Initiative | Sponsored by the NJDOL

## PACE develops pathways to successful employment for youth interested in the Heavy Equipment Operating field.

In just a short time you can learn critical skills to starting a career as an Operating Engineer using cranes, bulldozers, forklifts, drills, pumps, and other heavy equipment.

Funded by the NJ Department of Labor, PACE is a job training program designed for college-ready students entering their senior year of High School or having recently graduated.

Through Rutgers, we connect you with current professionals as trainers, mentors, and employers, who will teach you skills required for Registered Apprenticeships and jobs in the industry.

## Eligibility

- Between 17 - 24 years old
- Have an interest in the trades (construction, heavy equipment, etc.)
- Must complete intake form & career interest survey before enrolling

## Interested? Contact:

Victor Perez  
Senior Program Coordinator
